

MAJR Consulting (9000 Series) Mechanical and EMC

MAJR Products offers Mechanical and EMC consulting services to our customers that need to bring their product from design concept to testing compliance or any stage in between to meet MIL-STD 461 and other military or commercial standards.

Mechanical Engineering - Bibliography of Bill Spencer

Mr. Spencer is the Vice President of Mechanical Engineering at MAJR Products Corporation. He is responsible for the generation of all internal production drawings for manufacturing. He oversees all product estimating for quotation of new parts and existing designs and acts as a mechanical interface with customers for EMI/RFI shielding design. He is responsible for calibration for ISO-9001 and documentation for job traveler and all drawing revisions for production.

Bill holds a B.S. degree in Mechanical Engineering from Penn State University and has been a Mechanical Engineer since 1975. He has experience in equipment design and start-up and has been involved with shielding components since 1991. He has participated in anechoic chamber testing for EMI/RFI shielding for various honeycomb vent panels and has previously served as production manager for 13 years.

Electrical / EMC Engineering - Bibliography of Michael Oliver

Mr. Oliver is Vice President of Electrical / EMC Engineering at MAJR Products Corporation in charge of, new product development, EMC product consultation, technical quoting, and is the ISO-9001 Mgt. Representative. Mike has over 15 yrs. experience in EMI/RFI shielding technology including electronics, military shelter electrical systems, and high power antenna / radome design. Testing / design experience to MIL-STD 461, MIL-DTL-83528 and a variety of ASTM and industry standards.

Mike holds a B.S. degree in Electrical Engineering from Gannon University and has been an Electrical Engineer since 1989. He currently holds three patents (two pending), on thermal management-EMI/RFI shielding devices. He has experience in the design and testing of aerospace antennas, military electrical systems, and electromagnetic shielding components. Mike has performed open and anechoic chamber EMI / RFI radiated tests to military standards and has utilized many antenna and RF testing hardware systems. He has written numerous technical papers on electromagnetic compatibility (EMC) shielding components, EMC product enhancements, and the development of test specifications for antenna / radome radiated test methodologies. He currently serves as Chairman of the newly formed IEEE EMC Society Pittsburgh Chapter, as Co- Chairman of the SAE AE4 Electromagnetic Compatibility Committee, and is a member of the IEEE EMC and Standards and Advisory Coordination Committee (SACCom).
