

Ripstop Fabric Shield Tape Rolls with Conductive Adhesive (28-X000-83 Series)

Product Summary

MAJR Products Ripstop Fabric Shielding Tape is designed for any application where an instant shield between two adjoining surfaces is required.

Product Application

This Shielding Tape product is supplied in 100-foot rolls, in 1", 2" and 3" widths. The material is our finest CuNi Shielding Fabric backed with an aggressive conductive adhesive with a release liner. It can be used to enhance Shielding Fabric seams over any size surface or to repair rips. The tape can also be used to wrap around cables to provide instant shielding. It is a logical means to seal inside or outside seams in metal chassis to improve RFI performance by arresting RF leakage. The material is exceptionally strong, resistant to incidental tearing, and will not cut skin as metal shield tapes will. It is cut with scissors. This material is not subject to cracking that is consistent with metal tapes.

Product Technical Data

This product is consistent with the data we have for the 1407-41036-83, only difference is that this product is slit to precise widths and rolled to 100' lengths with a release liner.

28-1000-83 is 1" x 100'

28-2000-83 is 2" x 100'

28-3000-83 is 3" x 100'

(83) Nickel/Copper

- Surface resistivity of .05 ohms; abrasion resistance cycle of 1,000,000 cycles.
- Per Mil - DTL - 83528 shielding performance of 95 dB average in frequencies of 20 MHz to 5 GHz, with compression of 50% on a 1/4" x 1/4" gasket.
